About MetOcean

MetOcean Environmental Services & Solutions is an accredited house of expertise recognized by the Egyptian Ministry of Environment. Founded as a dynamic environmental consultancy, the company has grown steadily around a multidisciplinary team with more than fifteen years of combined experience in environmental management, quality and compliance.

MetOcean is deeply versed in national, regional and international environmental legislation, and works closely with clients and stakeholders to deliver sound environmental management — from small-scale activities to major infrastructure across marine, coastal, industrial and service developments.

15+ Years of Experience

600+ Projects Delivered

6 Countries Served

CEO Message

**Prof. Dr. Hussein Abdel Meguid
El-Naggar**

Chief Executive Officer
Professor of Marine Environment
Faculty of Science, Al-Azhar University
Accredited Environmental Consultant

MetOcean exists to meet our clients' needs with the best integrated environmental solutions available. We invest continuously in developing our team and equipping them with the latest technology, so that sustainable development is not just a goal, but a practice — built on the Best Available Techniques and the Best Environmental Practices in every engagement we undertake.

MetOcean is a leading force in the environmental field, working diligently to help shape a more sustainable community and economy. Our work is oriented toward a single outcome: a cleaner, greener environment for the industries, communities and coastlines we serve — in Egypt and across the region.

Vision, Mission & Values

Vision

To be a leading force in Egypt's environmental sector — helping shape a sustainable community and economy, and working steadily toward a cleaner, greener environment.

Mission

To meet every client's needs through the best integrated environmental solutions, continuously developing our team and adopting the Best Available Techniques (BAT) and Best Environmental Practices (BEP).

Values

Excellence and personal accountability in every assignment; solutions built for implementation, not just diagnosis; and partnerships that exchange knowledge and build lasting trust.

Why Choose MetOcean

Ministry-Accredited

A certified house of expertise recognized by the Egyptian Ministry of Environment.

Multidisciplinary Team

15+ years of combined expertise across marine science, geology, chemistry and engineering.

Full In-House Capability

Integrated studies, field measurements and mathematical modeling under one roof.

Specialist Network

Access to a wider bench of national and international consultants and technical experts.

Proven at Scale

Delivering everything from small single-site studies to major national infrastructure.

Regional Footprint

Active engagements across Egypt, the Gulf and the Levant.

Services Overview

Environmental Studies

EIA, audits, compliance and risk-management plans.

Environmental Measurements

Field monitoring of air, water, noise and emissions.

Environmental Modeling

Air, noise, thermal and groundwater dispersion modeling.

Sustainability & Carbon

Carbon footprint auditing, ESG and green-building advisory.

Environmental Studies

- 1

Environmental & Social Impact Assessment (EIA/ESIA)
- 2

Environmental Audits (EA)
- 3

Environmental Compliance Plans
- 4

Baseline Environmental Component Assessment
- 5

Environmental Response Plans (ERP)
- 6

Environmental Management Plans (EMP)
- 7

Hazardous Waste Management Plans
- 8

Solid Waste Management Programs (SWMP)
- 9

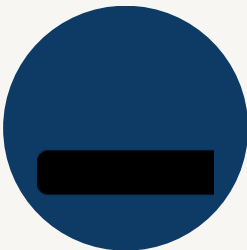

Environmental Risk Assessment (ERA)
- 10

Biodiversity Action Plans (BAP)
- 11

Environment, Health & Safety (EHS)
- 12

Environmental Records & Registers

Environmental Measurements

Ambient Air Quality

Suspended & Inhalable Particulates

Stack Emissions

Water Quality

Work Environment (Air, Water, Soil)

Wastewater Analysis (Sanitary & Industrial)

Ambient Noise

Thermal Comfort / Heat Stress

Environmental Modeling

Air Dispersion Modeling

Predicting the spread of airborne pollutants under real operating conditions.

Noise Dispersion Modeling

Mapping expected noise propagation around a facility or project site.

Thermal Dispersion Modeling

Simulating heat plumes and their footprint on the surrounding environment.

Groundwater Dispersion Modeling

Tracking the potential migration of contaminants through groundwater.

Quantitative Risk Assessment

Numerically evaluating hazard likelihood and consequence for major risks.

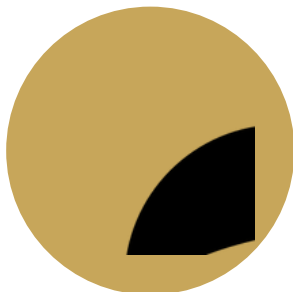

Surface Exposure & Illumination Studies

Assessing surface-level exposure and lighting-intensity impacts.

Sustainability & Carbon Footprint

MetOcean supports clients beyond regulatory compliance — building the sustainability strategies, carbon accounting and green-building practices that position organizations for the low-carbon economy.

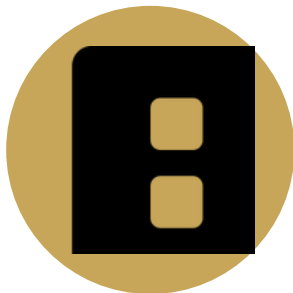

Carbon Footprint Auditing

Measurement and independent verification of organizational carbon footprints.

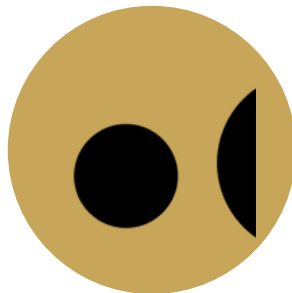

ESG Advisory

Environmental, social and governance strategy aligned to international frameworks.

Green Building Guidance

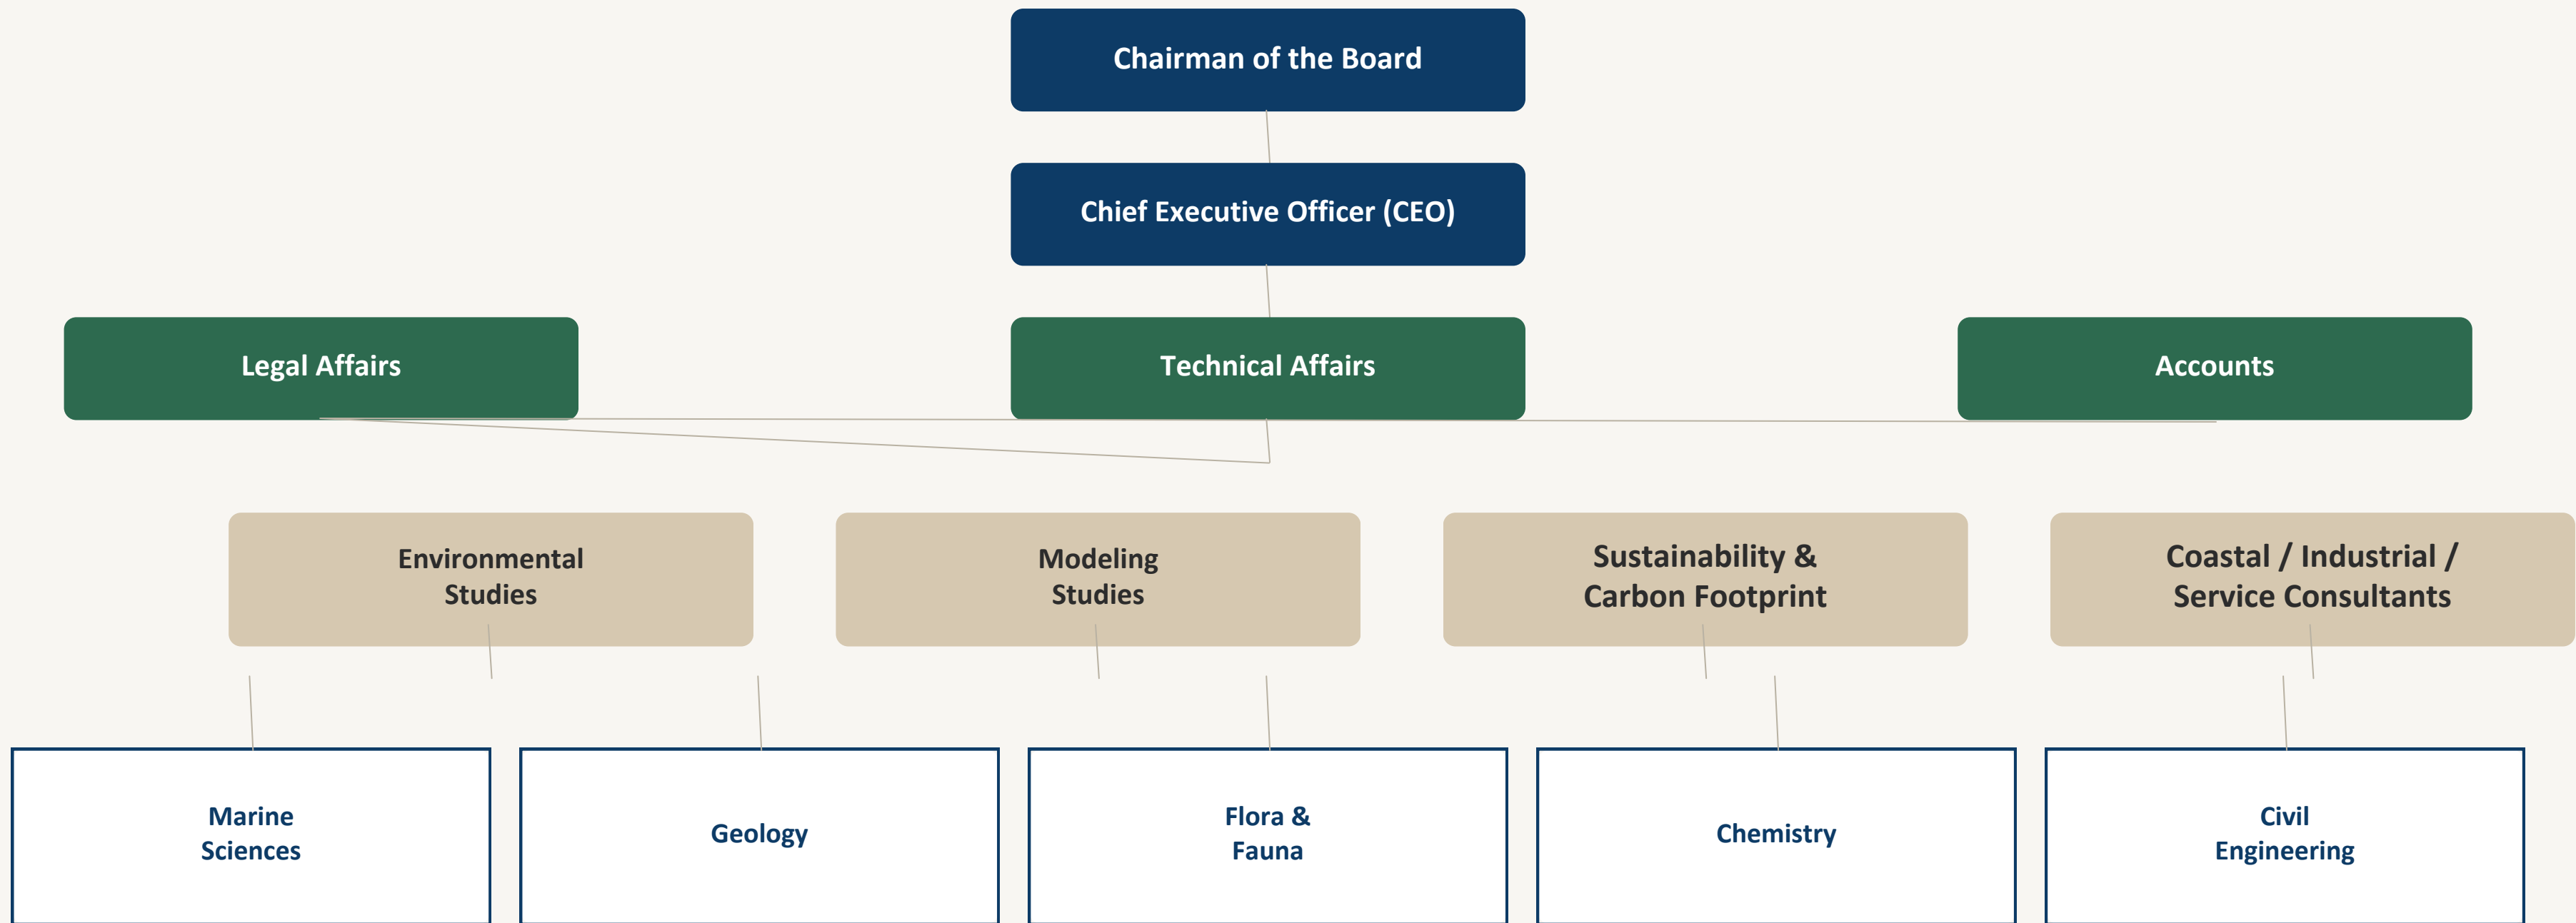

Environmental design input for lower-impact, resource-efficient facilities.

Capacity Building

Training and awareness programs that embed sustainability within client teams.

Organization Structure

Named consultants and specialists are detailed on the following two pages.

Leadership Team

Prof. Dr. Hussein Abdel Meguid El-Naggar

Chief Executive Officer

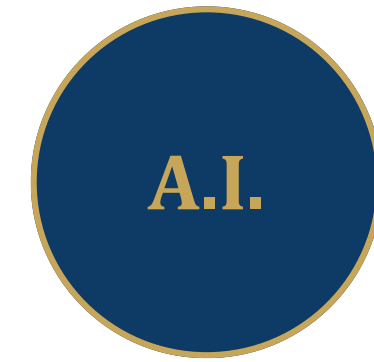

Professor of Marine Environment, Faculty of Science, Al-Azhar University · Accredited Environmental Consultant

Prof. Dr. Mohamed Abdel Hamid Ahmed

Marine Operations & Climate Consultant

Consultant for marine operations, environmental modeling and climate-change studies

Prof. Dr. Ahmed Ibrahim Hassaballah

Biodiversity & Carbon Footprint Consultant

Professor of Environment, Faculty of Science, Al-Azhar University · Carbon footprint auditor

Technical Experts

Dr. Hamdy Omar Ahmed

Institute of Oceanography & Fisheries, Alexandria

Dr. El-Sayed Abdel Aziz

Institute of Oceanography & Fisheries, Gharbaqa

Dr. Mahmoud Mahrous Farag

Biodiversity Consultant, Faculty of Science, Al-Azhar University

Dr. Khaled El-Haddad

Researcher, National Institute of Oceanography & Fisheries (NIOF)

Dr. Ali Abdel Hamid

Remote-Sensing Specialist, Egyptian Space Agency

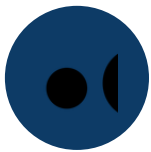

Dr. Mohamed Helmy

Marine Biology Lecturer, Faculty of Science, Al-Azhar University

Dr. Hossam El-Haddad

Industrial & Service Sector Environmental Specialist

Dr. Mohamed Sallam Bayoumi

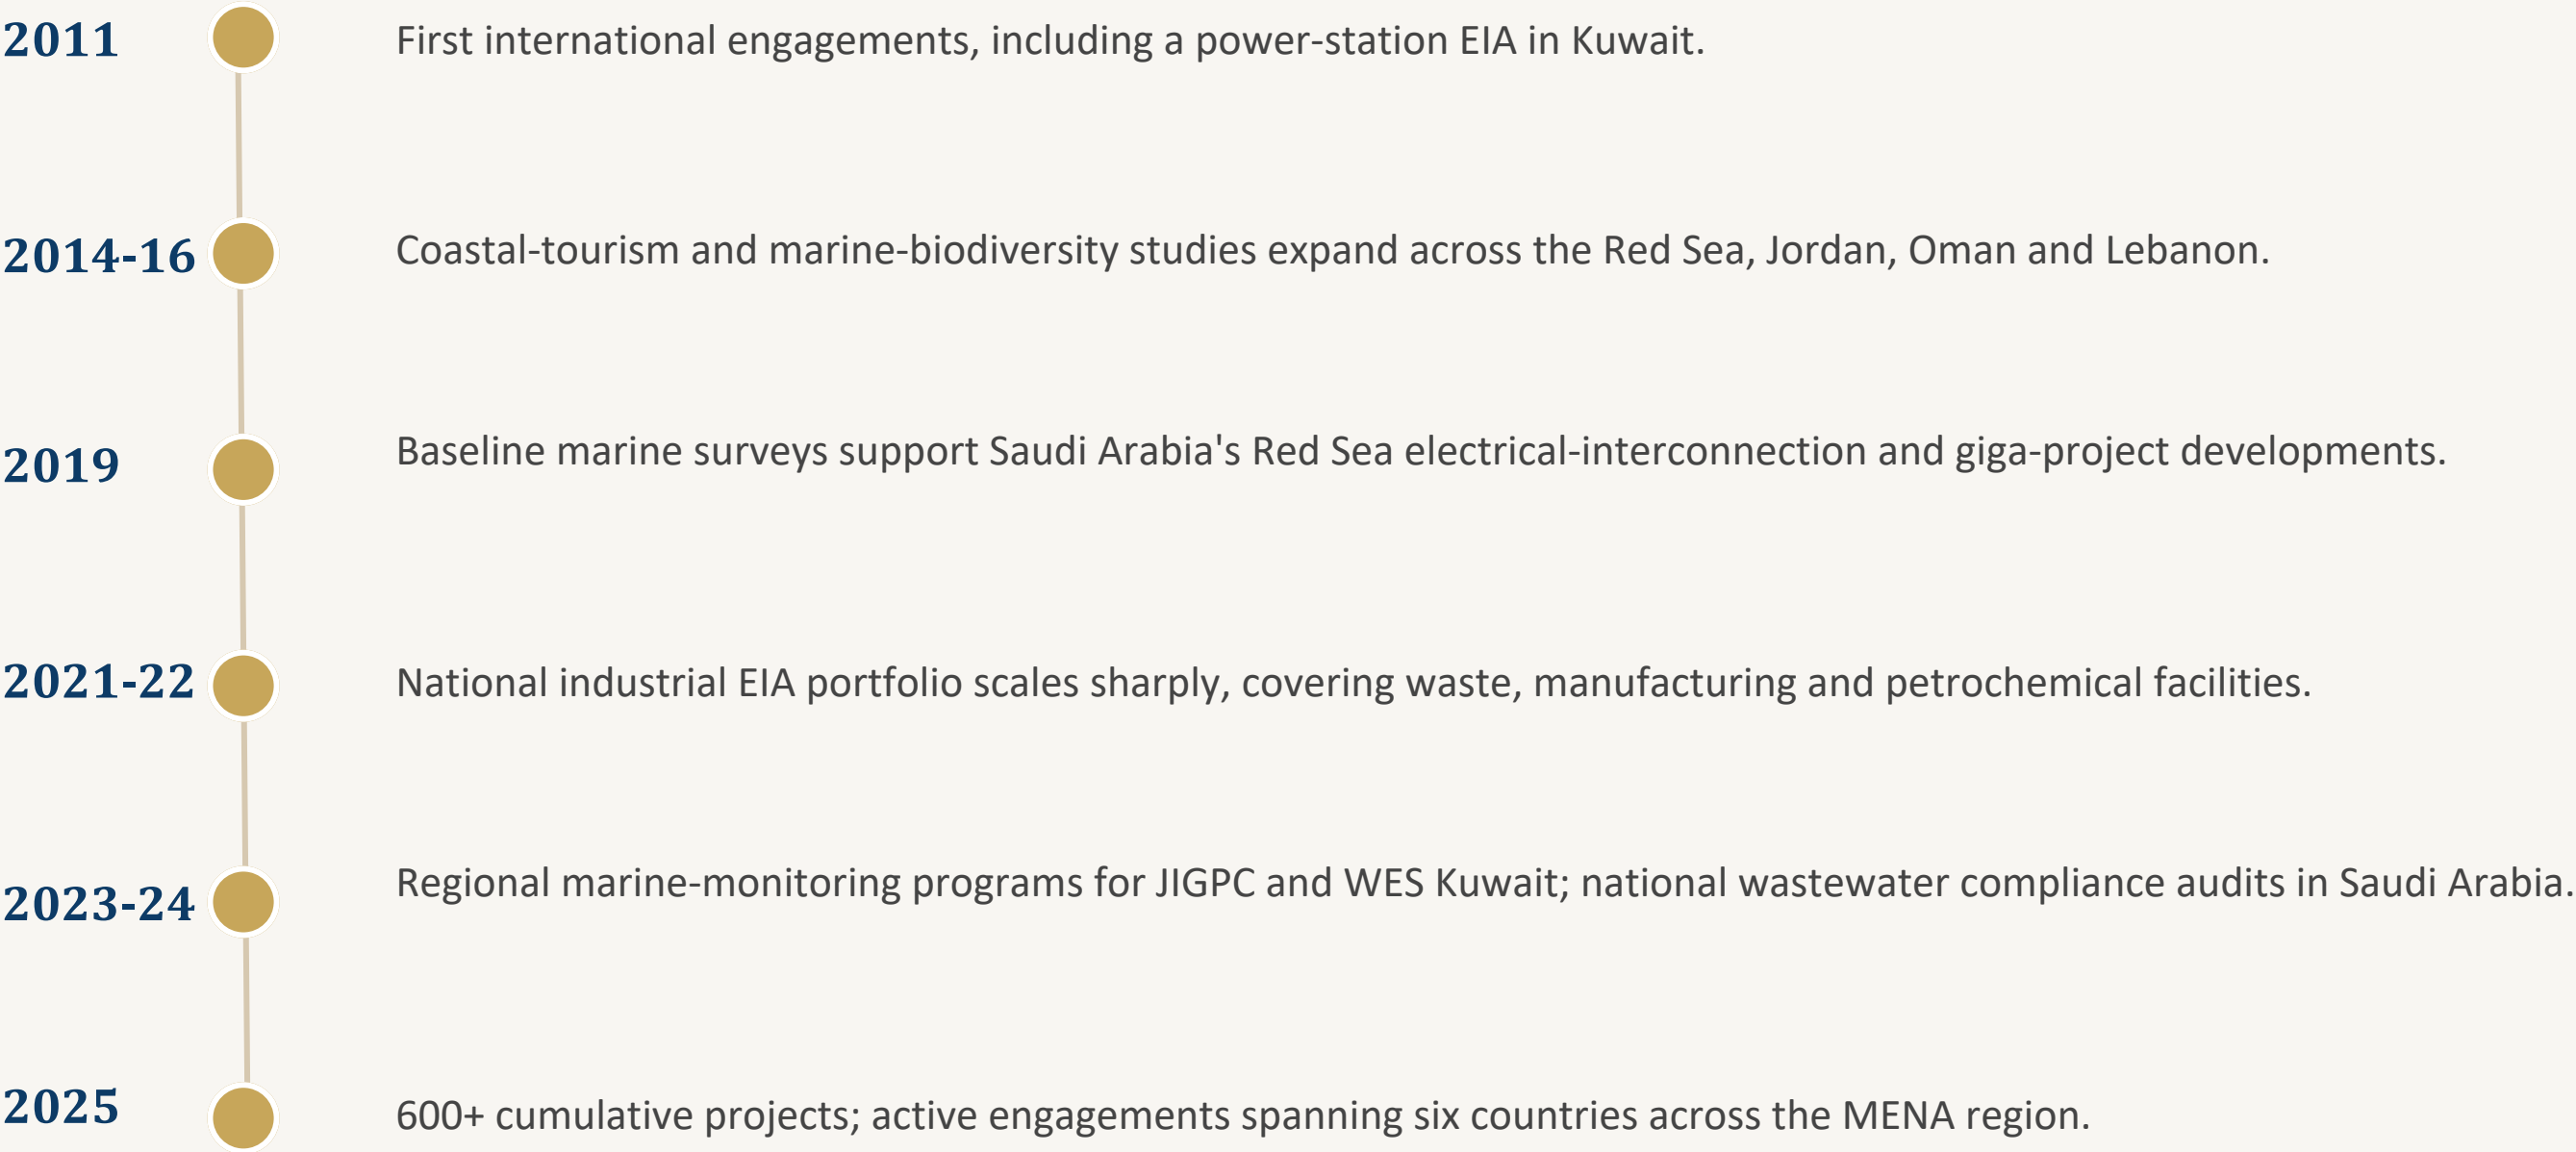

Environmental Measurements Specialist

Eng. Islam Ismail

Civil Engineer

Experience Timeline

Featured Projects

Red Sea Coastal & Marine Baseline Survey

Egyptian–Saudi Electrical Interconnection Project, Gulf of Aqaba

KINGDOM OF SAUDI ARABIA

JIGPC Marine Monitoring Program

Annual marine-biological survey and industrial-waste discharge study for a petrochemical complex

KINGDOM OF SAUDI ARABIA

NIOF Institutional Studies

Status assessment and staff-development EIA for the National Institute of Oceanography & Fisheries

ALEXANDRIA, EGYPT

National Industrial EIA Program

400+ environmental impact assessments for waste-transport, manufacturing and petrochemical facilities

NATIONWIDE, EGYPT

Clients

Energy & Petroleum

Petrogulf · Petrosaraf · Dragon Oil Egypt · Amapetco · Zafco

Industrial Manufacturing

Sanabel Fertilizers · Aluminium & steel producers · Chemical manufacturers nationwide

Waste Management

Ecocare · TANF · Multiple licensed hazardous- and solid-waste transport operators

Tourism & Coastal Development

Red Sea and North Coast resorts, marinas and hotel developments

Government & Research

National Institute of Oceanography & Fisheries · Ministry of Agriculture Research Center

International Programs

JIGPC & WES (Kuwait) · JREDS (Jordan) · IUCN ROWA (Jordan, Oman, Lebanon)

Certificates & Accreditations

MetOcean is registered and accredited by Egypt's Ministry of Environment as a licensed House of Environmental Expertise, with individual consultants separately accredited across environmental-impact assessment, biodiversity and carbon-footprint disciplines.

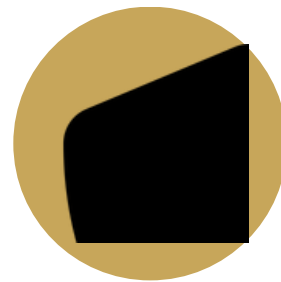

Registered House of Environmental Expertise

Egyptian Ministry of Environment —
Environmental Affairs Agency

Accredited Environmental Consultants (Class A)

Individually licensed consultants across EIA,
biodiversity and carbon-footprint auditing

Regulatory Compliance

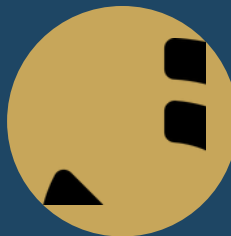

Certifications reviewed and renewed on a five-
year cycle in line with national requirements

Innovation & the Road Ahead

Smart Environmental Monitoring

IoT-enabled sensors for continuous, real-time environmental data.

Satellite & Remote-Sensing Integration

Expanded use of satellite data for coastal and marine surveillance.

AI-Enabled Modeling

Applying artificial intelligence to sharpen dispersion and risk modeling.

Marine Technologies

Growing our specialist marine-technology and blue-economy practice.

Regional Expansion

Extending our footprint further across the Gulf, the Levant and North Africa.

LET'S BUILD A SUSTAINABLE FUTURE
